RAWHIDE LEASE PROVING UP ORE

Grutt-Balloon Hill Lease is Going After Ore at Depth—May Install a Large Hoisting Plant.

On the Grutt-Balloon Hill lease active progress is being carried on, and it may now be said that the ore shoot is proven on the 185-foot level for over 100 feet and for this distance they are all in ore, says the Rawhide Press Times.

A carload was shipped yesterday to the Hazen sampler, and another will go out in a few days.

They are now crosscutting at the 250-foot level, which depth was reached this week. They are employing three shifts of men in the work and they expect to reach the ore body within two weeks. The ore shoot appears to be getting larger with depth, and mining men are of the opinion that they will have a large and rich ore shoot on this level.

The management is figuring on a large hoisting plant capable of sinking 1000 feet, as the one in use has about outlived its usefulness, owing to its small size.

The company is working on the 250-foot level almost exclusively on account of the hoist being inadequate for the work. They are not making any effort to take out any more ore than necessary in the course of development, but will wait for the big plant to be installed.

They are blocking out the ore with this end in view. It is said that the mine is looking better than it ever has.

Temperature Report

Yesterday's hourly temperature record at the weather bureau office was as follows:

5 a. m.	66
6 a. m.	65
7 a. m.	72
8 a. m.	77
9 a. m.	81
10 a. m.	84
11 a. m.	84
12, noon	85
1 p. m.	85
2 p. m.	86
3 p. m.	87
4 p. m.	88
5 p. m.	86

The highest temperature one year ago was 89, the lowest 63.

MONO LAKE TIMBER.

Forty thousand cords of wood and 32,000,000 feet, board measure, of yellow and lodgepole pine are to be sold from the Mono national forest by the forest service. Application for the sale has been filed in the office of the district forester at San Francisco, and is now being adver- tised. It will be sold at the end of thirty days to the highest bidder.

The tract from which the timber is to be cut comprises 7352 acres in the Mono crater region, a few miles southwest of Mono lake.

The sale, it is said, will be of the greatest importance to the interests of eastern California and western Nevada, as most of the wood and lumber cut will be marketed in the mines of that region and in the Tonopah and Goldfield districts.

The local ranching and mining in- terests in and about Mono valley will benefit greatly by this sale, for they now haul a large part of their lum- ber a distance of seventy miles.

After this sale is made, a supply of timber will be maintained at a convenient point for accommodation of the ranchers in Mono and Bridge- port valleys, and the mining inter- ests will be supplied from yards at Bodie.

In order to insure local interests a supply of timber in future the cutting upon the sale will be man- aged in such a manner that a suf- ficient stand of timber will be left to guarantee a second cutting within a few years.
